## Why choose Abode?

We are truly passionate about what we do and this is reflected through our unique product designs.

The Abode team have extensive experience and knowledge when it comes to kitchen sinks and taps. We design unique and exclusive products at our office in Barnsley.

As well as our premium quality and stylish designs we're also known for our service.

Our teams are dedicated to delivering the absolute best in performance and service in every aspect of what we do.

Established in 2002 our thirst for design, innovation, quality and service remains just as strong today as it was on day one.

This brochure focuses on our Regulation 4 approved collections of instant hot water taps, however we also have extensive ranges of kitchen taps, kitchen sinks and bathroom collections which can be viewed on our website [www.abodedesigns.co.uk](http://www.abodedesigns.co.uk)

### **Abode is part of Norcros PLC.**

Norcros is a market leading supplier of high quality and innovative bathroom and kitchen products.

We have a well established, successful track record of serving consumers, architects, developers, retailers and wholesalers. Our emphasis is on strong branding, contemporary designs, trusted quality, outstanding service, innovations and breadth of range. We base our business on understanding our customers' needs. Norcros is a substantial group with consistent, high quality standards and considerable resources. We invest significantly and continuously in our people, brands, product development and processes and we aim to develop our business in both the quality of our products and the scale of our activities.

# Selecting a Sink

1 MATERIAL 2 TYPE 3 SIZE 4 STYLE 5 FEATURES

## Material

**STAINLESS STEEL:** Stainless Steel is a timeless material which remains a popular choice. It is often a perfect match to the kitchen appliances so provides a coordinated finishing touch. As well as the aesthetics, it is easy to maintain and is extremely durable. All Abode sinks are constructed from premium 304 grade stainless steel and are available in an array of designs.

**GRANITE:** SiOForm® is a unique material solution engineered specially for our granite kitchen sink collection. The material is primarily made of pure and natural quartz, a material that is strong, resilient and extremely durable, making it an ideal addition for your kitchen. SiOForm® products have a uniform void-free structure and are resistant to dry temperatures up to 280°. Granite sinks are great for retaining water temperature, making it perfect for any busy kitchen environment. Our range consists of several unique designs in various shapes and sizes. Additionally, the Frost White, Grey Metallic and Black Metallic options add a premium and contemporary touch and create a striking focal point in your kitchen.

SiOForm® is available in the following colours:

**CERAMIC:** Our ceramic sinks are constructed from the finest grade fireclay and are hand finished for a premium quality finish. This traditional classic is available in undermount, apron front and inset options, providing an elegant finish every time. The glazing process ensures a long lasting and durable finish.

# Sink types

**UNDERMOUNT:** An undermount sink is installed under the worktop for a seamless, premium finish. Undermount sinks will work with a wide variety of worktop surfaces. Why not try pairing yours with a solid surface or granite worktop? There are a large range of bowl sizes and configurations to choose from in this offer, providing ultimate versatility when it comes to usage requirements. The tap is often mounted on the worktop, adding to the premium, sleek look.

**APRON FRONT:** This range consists of our Belfast and Provincial products. They are installed under the worktop with the front face visible so require a base cabinet with a specific height to house them. Traditionally these products are ceramic, for a more contemporary/industrial style, opt for the stainless steel Belfast.

**INSET:** An inset sink sits on top of the worktop and can be installed in any material, including laminate. An inset sink will often have a drainer integrated for ease and durable functionality. The tap is usually mounted on the sink and often these designs have two tap holes so they are reversible, meaning the drainer can be positioned either left or right.

# Sink sizes

Across our comprehensive sink collection, we have several sink sizes available. In the initial planning stages, it is important to consider how the kitchen is to be used to determine which option is best suited to your lifestyle requirements.

How do you use your sink? What would make your daily tasks easier so you can focus on the more important things? for example; what typically needs to fit in the main bowl? Is a larger main bowl size needed? Would the addition of a half bowl be beneficial? Is a drainer required?

## EXAMPLES ARE AS FOLLOWS;

Single Half Bowl

Single Bowl

1.5 Bowl

Double Bowl

Large & Extra Large Bowl options

## Style

The overall style of the kitchen will go a way to dictate the perfect sink and tap pairing. Bring colour into the kitchen with a granite sink and either a perfectly matched or contrasting tap pairing.

For example; an industrial style kitchen with dark colourways looks great with a stainless steel or granite sink plus a perfectly matched tap in stainless steel, black, or graphite. However, consider the finer details such as the handles or any key detailing on appliances/ accessories in the kitchen when selecting the perfect tap finish, it may be that a brass or copper tone is more suited to complement the kitchen overall.

## Sink features

LOOK OUT FOR THE FOLLOWING FEATURES ON SELECTED SINK RANGES

### FLUSH PLATE OVERFLOW

This removable overflow cover has the following benefits;

Removable for improved sink hygiene (easy clean)

Provides a sleek, premium finish

Constructed from solid stainless steel

### TOP MOUNTED OVERFLOW

Allows for maximum bowl filling

Dispose of drinks even when the bowl is full

Applies to the Neron range only

### ORBIT WASTE

Provides a minimalist look, whilst removing unsightly debris from view

Constructed from stainless steel and rubberised plastic

Dishwasher safe, as well as being easy to empty

All Abode Sinks are supplied with pipework

Look out for the following symbols throughout this section:

REVERSIBLE  
Overflow or drainer can be positioned either left or right.

# STAINLESS STEEL UNDERMOUNTS

## Understated simplicity

It's not just the material that's versatile but the range of products in this offer.

We're confident you'll find the perfect solution from our stainless steel undermount collection. Whether you're looking for a small single bowl, one and a half bowl, large bowl or even an extra large bowl!

We also have ranges which allow you to create the undermount look without the expense of solid surface. Take a look at our R15 range which can be either undermounted or inset so worktop material doesn't restrict you from creating the look you desire.

\* Handing as shown (left hand main bowl) sets waste slightly towards the back of sink cabinet. Right hand main bowl installations are valid, but wastes will be offset slightly forward. For more info see full specification sheet on our website.

DENTON

Perfect for compact kitchens and grander installations alike. In smaller spaces maximise worktop area thanks to Denton's small proportions or install as a practical preparation sink in a kitchen island unit as an addition to the main kitchen sink.

Single bowl

- Durable and hygienic composite granite construction with high temperature resistance (280°C)
- Compact design ideally suited for smaller installations or perfect as a second sink
- Undermount installation
- 600mm cabinet requirement in horizontal mounting position or 450mm in the vertical position
- Designed with small radius corners for a sharp look whilst remaining easy to clean
- Orbit waste with easy empty, fold-back basket and pipework included

## CERAMIC UNDERMOUNTS

Ceramic sinks are often perceived purely as a traditional option for a traditional setting, however this range of products is extremely adaptable. Try pairing with a contemporary tap in the finish of the moment for a striking effect.

Image shows the Belfast and ProTrad 3IN1 in Brushed Nickel

## BELFAST

A true classic! The Belfast sink is a staple when it comes to a traditional kitchen, not only does it sit beautifully in any kitchen setting, but it has a large bowl capacity making it perfect for the busy household or keen cook. Try mixing this classic sink with a contemporary tap to inject a modern twist, suitably paired with the other finer details of your kitchen design.

## GRANITE INSETS

Our range of inset granite sinks are truly distinctive. There are models with curvaceous contours and drainers with real design flair. These sinks don't only have big personality, they have true functionality. With 5 colours available across the range and all models constructed from our SiOForm® material, these sinks are as durable as they are striking.

See pages 100-105 for all sinks accessories

The curvaceous contours of the Aspekt make this sink a truly showstopping piece in any kitchen. The way the drainer flows down into the main bowl is a thing of elegance, all contrasted with square edges for a sharp and striking finish.

Image shows the Aspekt Single Bowl in White Granite and Nexa Monobloc in Chrome

# DUNE

Taking its name from the signature drainer design, mimicking the soft peaks that are formed across sand dunes. The Abode Dune is truly natural and organic in form, a soft silhouette with rounded corners that follow through into the bowl and styling allow for a striking yet functional focal point in any kitchen.

Hidden Orbit overflow design

## WASTES AND OVERFLOWS (MATT BLACK)

NEW

Stylish, slick, and streamlined. The Abode collection of Matt Black wastes and overflows are perfect for adding a touch of modern-day minimalism to your kitchen. A collection that pairs wonderfully with our Matt Black tap range, blends beautifully with our granite sink range and also provides a sharp, striking contrast with our stainless-steel sinks.

Manual basket  
strainer waste  
(90mm)

**AX1135**  
Matt Black  
£20

Rectangular  
overflow  
(55 x 30mm)

**AX1137**  
Matt Black  
£20

Rectangular  
overflow  
(90 x 30mm)

**AX1152**  
Matt Black  
£25

Round  
overflow

**AX1138**  
Matt Black  
£15

Handcrafted in Italy, with a Matt Black through colour, ensures ultimate quality and durability comes as standard

Due to its longer screw, our 90mm waste will fit any sink with the same waste measurement, regardless of thickness

The subtle yet stylish overflows adds a slight industrial touch to your kitchen

The 90mm rectangular overflow is compatible with the System Sync and R0 collections

Full specification documents can be found at [www.abodedesigns.co.uk](http://www.abodedesigns.co.uk)

## WASTES AND OVERFLOWS (ANTIQUE BRASS)

NEW

Timeless, traditional, and sure to take centre stage in your kitchen. Our collection of Antique Brass wastes and overflows will add a little luxury to your kitchen. Matching harmoniously with our Antique Brass tap collection to create a classical look that is sure to last.

Manual basket  
strainer waste  
(90mm)

**AXI136**  
Antique Brass  
£45

Rectangular  
overflow  
(59 x 35mm)

**AXI140**  
Antique Brass  
£20

Belfast basket  
waste  
(60mm)

**AXI151**  
Antique Brass  
£40

Round  
overflow

**AXI139**  
Antique Brass  
£15

Handcrafted, oil-rubbed and hand brushed in Italy to ensure ultimate quality and durability comes as standard

Due to its longer screw, our 90mm waste will fit any sink with the same waste measurement, regardless of thickness

The rectangular overflow is the perfect blend either modern and traditional or classic and contemporary to add depth to any kitchen scheme with paired tap and waste

Full specification documents can be found at [www.abodedesigns.co.uk](http://www.abodedesigns.co.uk)

## WASTES AND OVERFLOWS (BRUSHED BRASS)

NEW

Classic yet contemporary, making a stylish yet subtle statement in your home. Our collection of Brushed Brass wastes and overflows will add a little luxury to your kitchen. Even better, they're the perfect pairing to our Brushed Brass tap collections.

Manual basket  
strainer waste  
(90mm)

**AXI155**  
Brushed Brass  
£40

Rectangular  
overflow  
(55 x 30mm)

# Style & finishes

A completely unique range of designs shaped by our UK design team. From contemporary single levers and functional instant hot water taps to traditional monoblocs in a variety of finishes, we have an extensive range to ensure we have the perfect high quality design for every kitchen.

**Design, quality and innovation are at the heart of what we do.**

Finding a tap that not only matches, but perfectly complements your kitchen and all of the accessories within it can be challenging. That's why we are constantly updating our portfolio, as well as adding new finishes to the mix to ensure the perfect finishing touch every time.

# Tap performance

To ensure you achieve the best possible performance from your chosen tap, you need to be able to identify the existing plumbing system in place and therefore estimate the water pressure.

The following information provides a general overview on water pressure, however we do recommend that a plumber checks your water pressure with a pressure gauge.

## Lower Pressure (gravity fed / vented system)

You have a cold water tank in the loft space and a hot water tank in the airing cupboard

You don't have an additional pump which is activated when you turn on any hot tap

The amount of hot water available to you is limited

With a gravity fed system you can approximate your hot water pressure by dividing the vertical distance (A) in metres by 10 (e.g. 3m = 0.3 Bar)

You should choose taps which are suitable for use with a lower pressure system

## High Pressure (combi boiler)

You have a boiler but no separate hot water storage cylinder

The boiler is typically found in the kitchen

Hot water is delivered instantly and on demand

This system is typically delivers the hot water between 1 and 1.5 bar

You should be free to choose from most of our tap range

## High Pressure (pumped gravity fed system)

You have a cold water tank in the loft and a hot water cylinder in the airing cupboard

You have an additional pump (normally located near the hot water cylinder) which is automatically activated when you turn on any hot tap

The pressure is defined by the pump. See pump manufacturer's details.

You should be free to choose from most of our tap range

The amount of hot water available is limited

## High Pressure (unventilated system)

Most commonly referred to as a "Megaflo" or similar brand

You have a hot water cylinder directly connected to the cold water supply. Above the cylinder could be an expansion vessel. (The hot water cylinder is typically in the loft space)

You do not have a cold water tank

The hot and cold water pressure is typically around 3 bar

The amount of hot water available is limited

You should be free to choose from any of our taps

## WATER AERATION

All mixers use spout aerators or flow straighteners to add bubbles to the water. These innovations in fluid technology keep your water flow in a controlled and distinctive pattern and eliminates splash back.

## VALVE CARTRIDGES

Abode use ceramic disc valves in all of our tap designs. These are tested for over 200,000 cycles before we will pass them for use within our taps. Why? Well this means that under normal use conditions your tap valves have proven that they will work for many years to come. The kitchen tap is the most used appliance in the kitchen, so valve quality assurance is essential.

## TESTING

Abode products are designed specifically for the UK by our team of in-house designers. We use artisan hand polishing techniques, sophisticated plating and powder coating processes to ensure a blemish free surface, along with robotic production of parts for precision. Every Abode product is 100% end of line tested before it leaves the factory, giving you absolute peace of mind.

## EVERYTHING IN ONE BOX

After taking all this care with the product, we want to ensure they reach you in perfect condition with all the parts that you will need for a seamless and straightforward installation. Fixing kits and tail pipes (with non return valves where necessary) are provided. If the tap is heavy or tall, we also provide you with a tap stabilisation bracket in the box. We try and think of everything so you don't have to.

Throughout this section you will see the following symbols next to products where relevant:

## INSTANT HOT WATER TAPS

What do Pronteau customers love about our products?

Pronteau taps make a statement but you don't have to compromise on style. If it's a traditional tap, it's a truly traditional design. In true Abode style, we keep abreast of the latest kitchen trends and launch award winning products year in year out, offering our customers breadth of range, finishes and price points.

We won't compromise on quality and offer comprehensive warranties across the taps and boilers. We're on the end of the phone if you need us. Our customer service is praised and our friendly and dedicated team are here if you need us.

# The Boilers

Scan to view all  
Pronteau  
videos  
on our  
YouTube  
channel.

**PROBOIL.2X**

**PROBOIL.4E**

Pronteau taps across pages 116 to 143 include the PROBOIL.2X boiler which has a 2.1L tank capacity.

All Pronteau HotKey® taps across pages 144 to 157 include the PROBOIL.4E boiler which has a 4L tank capacity.

Both boilers have the following features:

Controllable temperature range which can be set between 75 & 98° via the on screen digital controls

Compact stainless steel tank which fits beneath a Belfast or Butler sink

Simple to install via colour coded connectors

On screen filter life indicator

WRAS approved

NATIONAL TEAM OF OVER  
30 SERVICE ENGINEERS  
ACROSS THE UK SHOULD  
YOU NEED US

Pronteau boilers are protected by our Proboil filters (supplied with all system purchases). These filters are essential to ensure protection of your boiler from scale build up as well as reducing water hardness out of the tap to improve taste and clarity of hot drinks.

Please visit [www.pronteau.co.uk](http://www.pronteau.co.uk) for more information on Pronteau maintenance.

# Choosing the right Instant Hot Water Tap

ACROSS THE PRONTEAU  
COLLECTION WE OFFER  
A WIDE RANGE OF  
STYLES AND FINISHES TO  
MEET YOUR CUSTOMERS  
DESIGN EXPECTATIONS.

## FUNCTIONS

3 IN 1

Domestic cold, domestic hot and  
filtered instant hot water.

4 IN 1

Domestic cold, domestic hot,  
filtered cold and filtered instant  
hot water.

## Why 98 degrees?

When we developed our innovative range of instant hot water taps for launch in 2016 we took into consideration every aspect of safety, not only for the dispensing of the hot water but also the maximum temperature requirements for the stored water in the boiler. This is the main reason our products store water to a maximum temperature of 98°C, as our products are fully compliant with Part G(3) of the UK Building Regulations, and all Pronteau taps, boilers and filters are WRAS approved or WRAS pending.

## STYLE

A variety of models, styles, popular finishes and boiler sizes allow you to tailor your experience of Pronteau hot water taps to ensure you get the right model for the customer every time.

Our latest additions include the Scandi and Industria collections which have been designed to perfectly pair with the latest kitchen design trends.

# The **3 IN 1** Collection

3 IN 1 functionality delivering; hot, cold  
and instant hot water

Dual stage handle across the collection  
for safe instant hot water delivery

Comes with the compact PROBOIL.2X  
boiler with a 2.1 litre capacity

All Pronteau taps have cool touch spouts  
thanks to a centrally insulated steaming  
water channel

Supplied with multistage filtration to  
address scale formation in the boiler,  
remove contaminants, and improve taste  
& odour for the perfect hot drink

Free filter recycle scheme

£949

The perfect pairing for an Abode ceramic sink. Our compact PROBOIL.2X boiler sits neatly in a Belfast cabinet.

Add the NEW Fenton handspray alongside the ProTrad for pull out spray functionality.

Instant hot water is dispensed via a two stage handle operation, push the left handle down and pull forward to release the instant hot water.

Each tap is supplied with the temperature controllable, 2L PROBOIL.2X boiler and paired filter to protect your boiler and deliver the perfect hot drink.

# Why choose

# Instant Hot Water Taps?

## 1/ TAP DESIGN CHOICE

Wide range of trend-led tap styles in a range of finishes.

## 2/ CONTROL

On screen boiler display giving the ability to manually adjust settings (temperature, manual eco mode etc.) Tank capacities of 2L and 4L.

## 3/ SERVICEABLE

It's easy to change a Pronteau valve if needed (easily accessible), and we have a comprehensive spares service in-house.

## 4/ SAFETY

The patented HotKey®, locking levers or thumb slide provide a safety mechanism for family households and solution for the aging/inclusive market.

## 5/ NO HIDDEN COSTS

Everything is included with Pronteau.

When buying a tap you will always receive the specified boiler and a filter which controls scale and improves the quality of the instant hot water (and filtered water where applicable).

## 6/ BOILER SIZE

Both PROBOIL boilers are compact enough to fit under a Belfast sink.

## 8/ COMPLIANCE

All Pronteau products and associated components are Regulation 4 compliant (of Part G Building Regulations) and have current WRAS/KIWA approvals (or approvals pending).

## 9/ COOL TOUCH SPOUT

The Pronteau spout is designed not to heat up when dispensing steaming water.

## 7/ TEMPERATURE IN THE CUP

We independently tested the water temperature in the cup from a kettle, a Pronteau tap and other hot taps on the market. We found only 2 degrees in-cup temperature difference between a kettle and Pronteau due to its controlled laminar flow. The in-cup temperature can be significantly reduced if excessive steam is present on dispensing of instant hot water.

## INDUSTRIAL STYLE TAPS

Add soft industrial touches and texture to your kitchen design with the Hex and Fraction families. Our industrial taps offer will coordinate effortlessly with any kitchen featuring industrial style elements or add interest and edge to a kitchen design featuring traditional elements.

## CONTEMPORARY TAPS

Contemporary taps can be defined by several characteristics; sleek lines, stark shapes, distinctive spout styling, the latest finishes and more. The carefully thought out selection of styles available across our range ensures there is a style to suit every environment.

Complement your kitchen design with the latest finishes to add a showstopping feature tap.

Image shows the Agilis Single Lever in Brushed Brass

## SINGLE LEVERS

With a variety of benefits, the single lever tap is a popular choice for many, so water wastage is minimised whilst the flow gets to the right temperature. The temperature is easy to adjust with a flick of the wrist and several sleek and streamlined designs, including top lever styles are available.

## PULL OUT & PROFESSIONAL TAPS

Enhance your kitchen with our pull-out taps, perfect for pan filling, dish rinsing, food prep, and sink cleaning. Ideal for keen cooks and busy families, these taps simplify your daily tasks with ease and efficiency.

Our range includes two types: the true pull-out with a discreetly hidden hose, and the professional-style pull-around with an external hose. The true pull-out allows for seamless, full-length extension, while the pull-around offers a striking professional look. Many models feature an additional spray function, effortlessly switching from standard flow to a powerful spray at the touch of a button, providing versatility and precision.

Our professional taps combine manoeuvrability and striking design, making them a standout addition to any kitchen. With sleek aesthetics and functional brilliance, they are the perfect blend of form and function.

See our stainless steel range for pull out and professional taps constructed from solid stainless steel.

Image shows the Genio Semi-Professional Monobloc pull around in Matt Black

Building on the success of the Tubist collection this uniquely styled tap adds an intuitive, ergonomic spray functionality in addition to the normal aerated water flow. Ideally suited to those looking for improved practicality without compromising on style, the Tubist T will be as easy in the hand as it is on the eye.

Tubist T  
Pull Out Spray

**AT2190**  
Chrome  
£449

 **abode**  
distinctly

Ergonomic 'T' spray functionality for effortless flicking between standard and spray settings

Cool touch sprayhead for hot spraying practicality

Cold-start, ceramic disc technology: Mitigates unnecessary boiler operation and removes handle-to-wall interference

Bubble-Tec aerated water for improved water efficiency and reduced splashing

Supple-flex hose for enhanced pliability with 60cm reach, permitting access to the corners of the largest format sinks

**AT2191**

## STAINLESS STEEL TAPS

Stainless steel as a material has several well loved benefits including:

It is a closer match to stainless steel sinks and appliances

The material itself is 100% recyclable

Stainless steel taps have no coating, they are just polished and brushed

It is more durable and less likely to scratch, small scratches can be brushed out

Stainless steel is a naturally hygienic material

Image shows the Stalto Professional

# AQUIFIER™ WATER FILTER TAPS

The Abode Aquifier range features popular designs from our tap range as well as exclusive designs with the added benefit of a dedicated filtered water function – straight from the tap.

Image shows the Belfast and Atlas Aquifier in Matt Black

TAPS

WATER FILTER 297

# Benefits of a Water Filter Tap...

**WATER QUALITY:** An Aquifier tap or Switch device filters particulates from water, reduces the taste and odour of chlorine and reduces water hardness.

**HEALTH:** Having filtered cold water on tap can encourage the consumption of more water. Fill a reusable water bottle each day directly from the tap.

**ENVIRONMENT:** By removing the need for bottled mineral water every home with an Aquifier product is doing their bit for the environment by reducing single use plastic consumption.

**COST:** If bottled mineral water is a frequent purchase in your household you can save considerable amounts each year by switching to an Aquifier or Switch product.

**SPACE SAVING:** If you have a water filtration jug or bought bottled water just think how much space you can free up in the fridge.

**APPLIANCE HEALTH:** If you live in an area with particularly hard water you will notice that the kettle suffers as a result of the limescale build up over time. Fill your kettle with filtered water and prolong its life.

## How Aquifiers work...

### HOW OFTEN DO I REPLACE MY FILTER?

It's simple to maintain your filter, it sits in a bracket, in the base cabinet below the sink. These are easy for anyone to replace using our simple, fast and secure 'SafeLock' system.

We offer a dedicated filter reminder service – we'll send you a reminder by email each time your filter is due for renewal.

Filters are easy to buy as singles or packs from [www.abode-shop.co.uk](http://www.abode-shop.co.uk) when the time comes to replace.

It's important to change the filter at the recommended intervals to ensure the consistency of the supply of fresh, filtered drinking water.

**USAGE:** The capacity of the filter for Aquifier and Switch products vary, these range between 1000L and 6000L (dependent on incoming water quality and usage).

We have both Classic and High Resin filters available, specifically tailored for use in soft water or hard water areas respectively.

If you live in a soft water area the filter will be used up much slower than one in a hard water area (based on a standard average usage).

We recommend that our filters are changed every 6 months on average. If you live in a hard water area or have a higher filtered water consumption, replacements every 3-4 months may be beneficial.

The Safelock high resin filter is included as part of the FREE Abode filter recycle scheme.

Orcus 3 Way Aquifier

**AT2072**  
Chrome  
£480

- Dedicated hot, cold and filter control handles  
(filter control at the front of the tap)
- Dedicated filtered water pathway (doesn't share with hot & cold)
- Anti-splash spout design

Turn the middle lever clockwise for filtered water

Full filter starter kit supplied

Puria  
Aquifier

**AT2042**  
Chrome  
£360

Abode lead the market in innovative filter water taps and the latest addition to the range is no exception

It has a single lever cold start valve offering smooth flow and temperature control. Filtered drinking water is delivered through a separate channel delivering refreshingly fresh filtered water.

Modern engineering makes this probably the slimmest filter tap available today

Tall swan spout, with in built aeration keep filtered water and potable supplies separate

Rotate the  
filter lever  
back for  
filtered water

Full filter starter kit  
supplied

**AT2043**  
Brushed Nickel

# Introducing (switch)

*A revolution in filtered water technology*

## HOW DOES A SWITCH PRODUCT WORK?

Convert **ANY** kitchen tap to one which delivers filtered water as well as the standard cold water supply

The easy way to get filtered water from any style of tap

Simple to install either through the worktop, or any standard sink 35mm tap hole or even in the sink cabinet

Easy to use, just turn to divert to the filtered water function and back again to the standard cold water supply

Can be installed alongside a new tap or retro-fit with an existing tap

Award winning, unique product design

MAKE THE SWITCH  
FROM BOTTLED WATER,  
SAVE MONEY AND THE  
ENVIRONMENT

See our cost saving infographic,

Improve the overall taste and quality of the drinking water  
from any tap by adding a Swich device

Swich is easy to install and use, simply twist the device to  
divert the cold water to refreshing, filtered water and back  
to unfiltered cold water as desired

Choose from an array of finishes to perfectly complement  
your tap and kitchen design

To ensure the perfect solution, choose from two filter  
options. Choose the Classic Filter for soft water areas  
and the High Resin filter for hard water areas to ensure  
maximum longevity of the filter

CONTEMPORARY HANDSPRAYS

Introducing the Click Handspray, available in 6 colourways.

This collection allows you to enhance your kitchen with added functionality and will pair perfectly across a broad selection of Abode and Pronteau taps.

The ergonomic clicker button promises durability and ease of use to make light work of cleaning and cooking tasks.

## WARRANTY

### COMPREHENSIVE WARRANTY

In the unlikely event that you should experience any defect in the materials or workmanship of your new

- Abode sink within 10 years of purchase
- Abode tap within 5 years of purchase
- ProBoil boiler within 2 years of purchase

The purchaser's sole remedy shall be the replacement (at the manufacturer's discretion) of all or any part of the product that is defective.

For the tap, all working parts and valves are guaranteed for a period of 5 years from date of purchase. Decorative surface finishes and O-rings are guaranteed for 1 year from the date of purchase provided that our advice concerning care has been observed and no scouring agents have been used.

This is provided that the sink, mixer or tap has been used for normal domestic purposes and that the care, installation and maintenance instructions have been observed. The warranty extends to the original purchaser only.

## CUSTOMER CARE

### CAUTION

Repeated release of boiling hot water directly into coloured sinks can in extreme cases cause crazing and even cracking. Therefore we recommend great care is taken not to release the water directly on to the sink surface at full temperature for extended periods.

### WATER REGULATIONS

All products should be installed in accordance with Local Water Bye Laws.

Visit [www.abodedesigns.co.uk](http://www.abodedesigns.co.uk) to search all products with a current WRAS approval.

Our ProBoil boilers store water at a maximum temperature of 98°C to conform to UK legislative limits. Spout exit temperatures will vary according to environmental changes and usage patterns.

### TECHNICAL SUPPORT

Choosing the right mixer tap and sink for your home is an important choice as the tap is not only the most architectural item in your kitchen, but also the most used.

Think about the style you require, the ease of use you are looking for, and then consider your existing water supply and the water pressure available to you. If you have any questions with regards to whether a tap will be suitable for your application, please contact our technical support team or visit our website [www.abodedesigns.co.uk](http://www.abodedesigns.co.uk) for more details.

For sinks, consider the material and colour you prefer, the uses of the sink, the number and bowl sizes, the type of worktop material you propose to use and the base unit space available to install within.

Your long-term satisfaction with the product is important to us. In the event that you require spare parts for your Abode product, please contact our technical support team or visit our web site for further technical information.

Scan to visit  
our YouTube  
channel for  
support videos.

### THE SMALL PRINT

Abode is a division of Norcros Group (Holdings) Limited.
