

# About Us

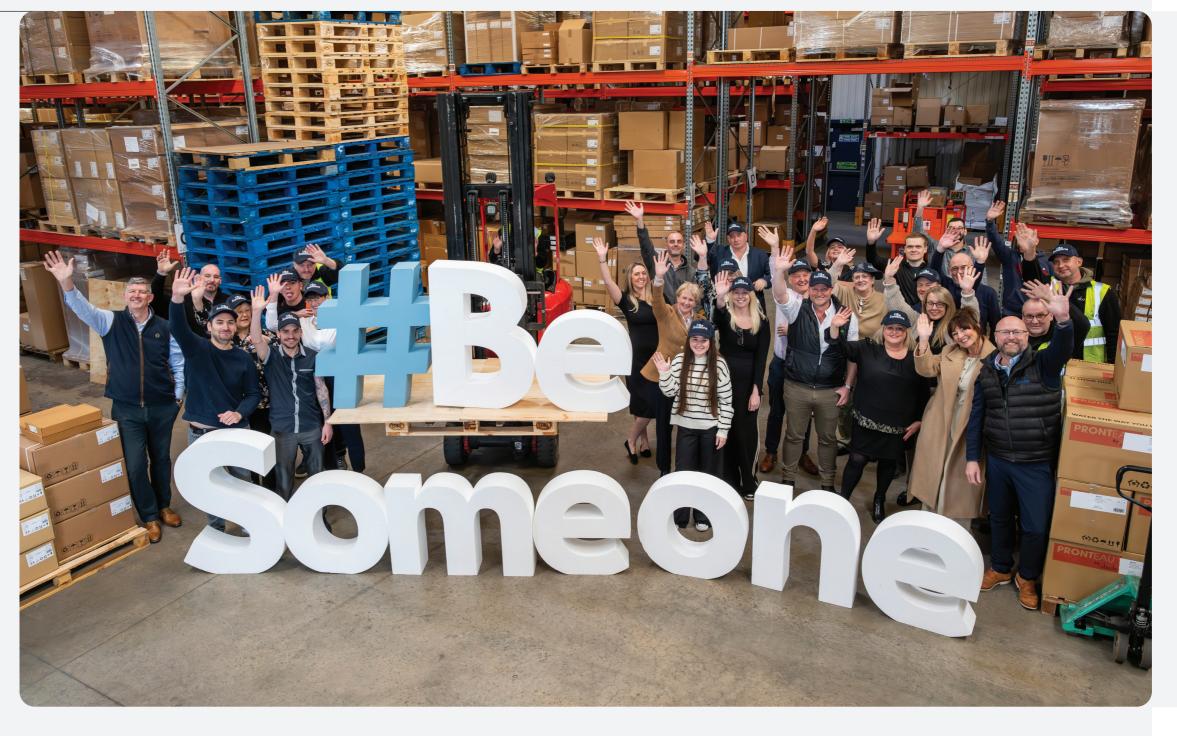

From our family to yours, we inspire and enhance homes with heart and passion in everything we do.

Abode is brought to you by a team of specialists with a passion for our products but moreover, our customers. Established in 2002 and with members of the team who have been with us since the very beginning, our people are a key ingredient in what makes Abode so unique and loved by so many.

When we ask our customers why they choose Abode, time and time again, they say the same three things:

Design, Quality and Service.

# Design

We design exclusive product collections in Britain each year, enabling our customers to personalise the most important and functional rooms in their home with products that are a reflection of their personal style.

Our team of industry specialists always have their finger on the pulse of the latest trends, enabling us to deliver new products each year that perfectly complement our customers designs, giving the ability to express an element of their personality in each room they transform.

From beautiful kitchen taps to lifeenhancing instant hot water taps, paired with a functional kitchen sink; the kitchen wet zone can be fully crafted with Abode products and accessories to create a showstopping focal point when entertaining as well as being supremely functional for everyday living.

But don't just take our word for it. We are renowned for award winning product design and have been recognised by various industry awards.

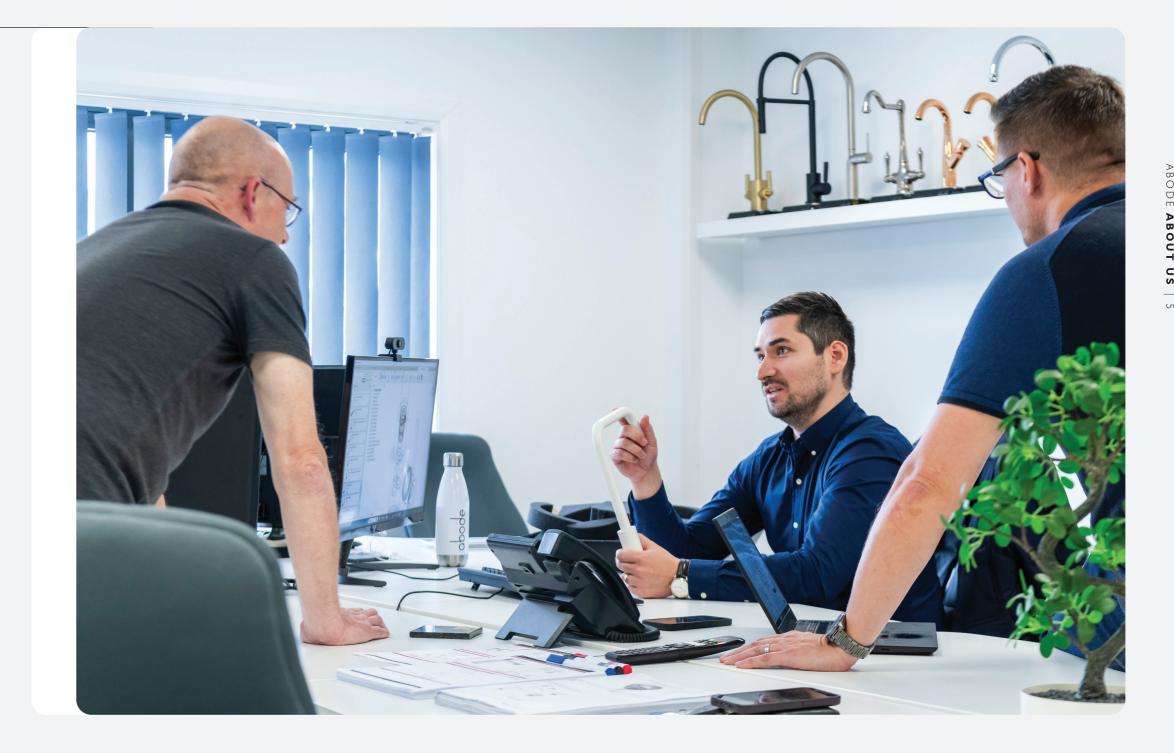

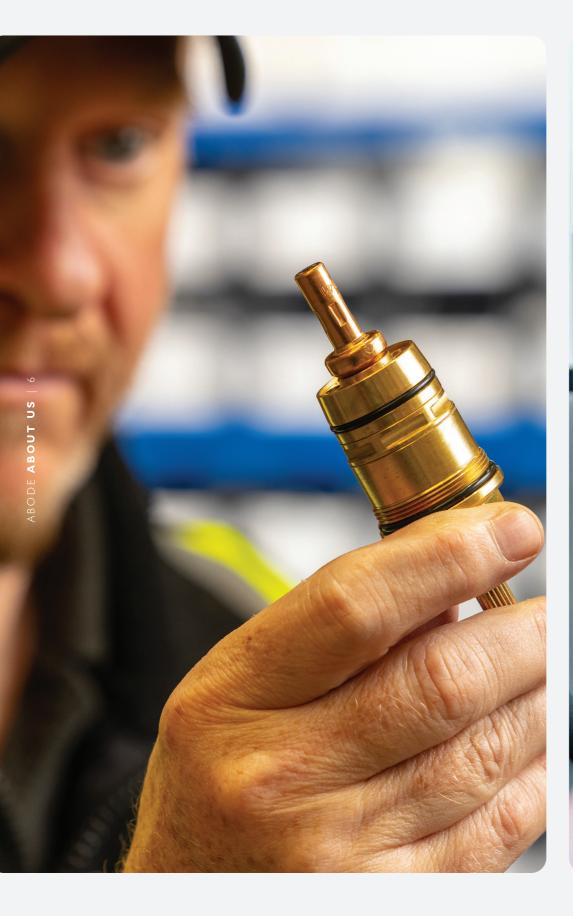

# Quality & Service

You can rest assured when choosing those all-important finishing touches for your home that Abode is the right choice.

As well as designing our products, we put each and every one of them through rigorous testing both in the UK and in the manufacturing facilities to ensure that when our products make their way to the centre of your home and daily life, that they will stand the test of time.

However, if you do ever need us our friendly and experienced team are here for you. We have experts available on the end of the phone at our Barnsley offices and they pride themselves on ensuring our customers receive the very best service every time they might need us. We also operate a comprehensive spares service for all Abode products to ensure they can be responsibly maintained when needed rather than replaced.

# Material

# Stainless Steel

Stainless Steel is a timeless material which remains a popular choice. It is often a perfect match to the kitchen appliances so provides a coordinated finishing touch. As well as the aesthetics, it is easy to maintain and is extremely durable. All Abode sinks are constructed from premium 304 grade stainless steel and are available in an array of designs.

# Granite

SiOForm® is a unique material solution engineered specially for our granite kitchen sink collection. The material is primarily made of pure and natural quartz, a material that is strong, resilient and extremely durable, making it an ideal addition for your kitchen. SiOForm® products have a uniform void-free structure and are resistant to dry temperatures up to 280°. Granite sinks are great for retaining water temperature, making it perfect for any busy kitchen environment. Our range consists of several unique designs in various shapes and sizes. Additionally, the Frost White, Grey Metallic and Black Metallic options add a premium and contemporary touch and create a striking focal point in your kitchen.

of natural

SiOForm® is available in the following colours:

white granite

frost white

black metallic

# Ceramic

Our ceramic sinks are constructed from the finest grade fireclay and are hand finished for a premium quality finish. This traditional classic is available in undermount, apron front and inset options, providing an elegant finish every time. The glazing process ensures a long lasting and durable finish.

abode

SELECTING A SINK SINK SIZES |

# Sink Types

#### An undermount sink is installed under the worktop for a seamless, premium finish.

Undermount sinks will work with a wide variety of worktop surfaces. Why not try pairing yours with a solid surface or granite worktop? There are a large range of bowl sizes and configurations to choose from in this offer, providing ultimate versatility when it comes to usage requirements. The tap is often mounted on the worktop, adding to the premium, sleek look.

# This range consists of our Belfast and Provincial products.

They are installed under the worktop with the front face visible so require a base cabinet with a specific height to house them. Traditionally these products are ceramic.

# Inset

# An inset sink sits on top of the worktop and can be installed in any material, including laminate.

An inset sink will often have a drainer integrated for ease and durable functionality.

The tap is usually mounted on the sink and often these designs have two tap holes so they are reversible, meaning the drainer can be positioned either left or right.

# Sink Sizes

Across our comprehensive sink collection, we have several sink sizes available. In the initial planning stages, it is important to consider how the kitchen is to be used to determine which option is best suited to your lifestyle requirements.

How do you use your sink? What would make your daily tasks easier so you can focus on the more important things? For example; what typically needs to fit in the main bowl? Is a larger main bowl size needed? Would the addition of a half bowl be beneficial? Is a drainer required?

# Examples are as follows;

Single Bowl

15 Bowl

Double Bowl

Large Bow

Extra Large Bowl

# Look out for the following features on selected sink ranges

# Flush Plate Overflow

This removable overflow cover has the following benefits;

- O Removable for improved sink hygiene (easy clean)
- O Provides a sleek, premium finish
- O Constructed from solid stainless steel

# Top Mounted Overflow

- O Allows for maximum bowl filling
- O Dispose of drinks even when the bowl is full
- O Applies to the Neron and Synchronist ranges

# Orbit Waste

- O Provides a minimalist look, whilst removing unsightly debris from view
- O Constructed from stainless steel and rubberised plastic
- O Dishwasher safe, as well as being easy to empty

Look out for the following symbols throughout this section:

Overflow or drainer can be positioned either left or right.

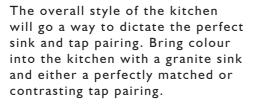

2nd tap hole for Swich

or inset

Sink Style

For example; an industrial style kitchen with dark colourways looks great with a stainless steel or granite sink plus a perfectly matched tap in stainless steel, black, or graphite. However, consider the finer details such as the handles or any key detailing on appliances/accessories in the kitchen when selecting the perfect tap finish, it may be that a brass or neutral tone is more suited to complement the kitchen overall.

All Abode Sinks are supplied with pipework

# SINKS STAINLESS STEEL UNDERMOUNTS | 16

# Stainless Steel Undermounts

# Understated simplicity

It's not just the material that's versatile but the range of products in this offer.

We're confident you'll find the perfect solution from our stainless steel undermount collection. Whether you're looking for a small single bowl, one and a half bowl, large bowl or even an extra large bowl!

We also have ranges which allow you to create the undermount look without the expense of solid surface. Take a look at our RI5 range which can be either undermounted or inset so worktop material doesn't restrict you from creating the look you desire.

SYSTEM

The innovative System Sync, designed to work with you and your kitchen.

Overflowing with features and versatility that offers up superlative functionality, maximises workflow, and liberates worktops.

With the combination of bowl sizes available, flexible 2INI installation, integrated smart rail and a range of accessories.

System Sync offers so much more than bowls to simply wash up in, it allows for a whole host of kitchen tasks to be performed super efficiently - saving time and space for those things that matter.

System Sync bowls have been expertly crafted from 0.8mm 304 grade brushed stainless steel to ensure a finish that is as durable as it is sleek and stylish.

All accessories are tailored to fit System Sync perfectly and are stackable to further optimise space.

Simplify. Streamline. Synchronise with System Sync

- as well as either inset or undermount. An efficient solution for any size space.
- O Durable 304 Stainless Steel Construction. Resilient Imm thick material ensures long lasting performance, resisting stains corrosion and high heat.
- O Efficiency Re-imagined. Offering up more than just bowls to wash up in, System Sync allows for a whole host of kitchen tasks to be performed super effortlessly.
- O The Perfect Fit. Built around the accessory trio and integrated smart rail. Allowing for maximal workflow with minimal space.
- O Sophisticated Brushed Finish. Adds a polished, refined look while resisting watermarks and scratches for easy maintenance.
- O Orbit Waste with Fold Back Basket. A seamless waste solution that keeps debris out of site while being simple to clean for improved sink hygiene.
- O Complete Solution. Includes all necessary components for easy installation and
- O Waste Disposer Compatibility. The 90mm waste hole accommodates modern waste disposers, adding further functionality to your kitchen setup.

# Wastes and overflows

# Luxury In Every Detail

Sometimes, the most powerful design elements lie in the details. Our collection of sink wastes and overflows in Matt Black, Antique Brass and Brushed Brass allows for an extra layer of customisation, ensuring every element of your kitchen contributes to the overall aesthetic

A Brushed Brass basket strainer waste paired with the GRI5 sink in Black Metallic Granite adds a sense of quiet luxury, while a Matt Black basket strainer waste and Rectangular Flush Plate Overflow introduce a striking contrast against our Stainless Steel R15 range. These finishing touches may be subtle, but their impact is anything but.

# Tap Style

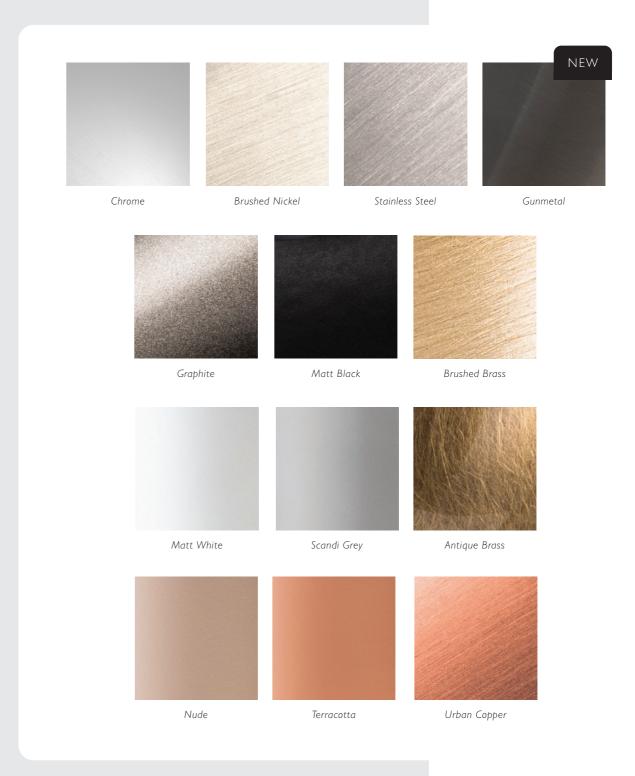

A completely unique range of designs shaped by our UK design team. From contemporary single levers and functional instant hot water taps to traditional monoblocs in a variety of finishes, we have an extensive range to ensure we have the perfect high quality design for every kitchen.

Design, quality and innovation are at the heart of what we do.

# **Finishes**

Finding a tap that not only matches, but perfectly complements your kitchen and all of the accessories within it can be challenging. That's why we are constantly updating our portfolio, as well as adding new finishes to the mix to ensure the perfect finishing touch every time.

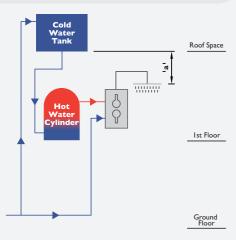

#### Boiler Types

#### Which type of boiler do I have?

3 types of boiler systems exist: gravity-fed, combi boiler and unvented and each can influence water pressure differently.

#### Gravity-Fed

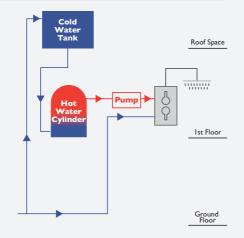

Found in older UK housing with the following features typically:

- O Typically features a cold-water tank in the loft and a hot water cylinder elsewhere in the house.
- O Hot and cold pressures are typically unbalanced (the cold-water pressure is higher than the hot). Cold water pressure is as per incoming mains.
- O Hot water pressure (head pressure) is distance 'a' in metres divided by 10. For examples if 'a' is I metre then the hot water pressure is approximately
- O This type of system is generally considered as low pressure.

#### Gravity-Fed (pumped)

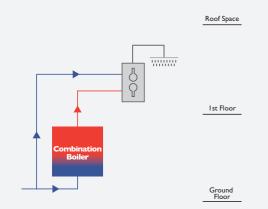

Found in older UK housing that has been modernised.

- O Hot and cold pressures are typically unbalanced (depending on the cold mains pressure and the rating of the hot water pump). Cold water pressure is as per incoming mains.
- O Hot water pressure is as per the pump rating.
- O This type of system is generally considered as high pressure.

#### Combi Boiler

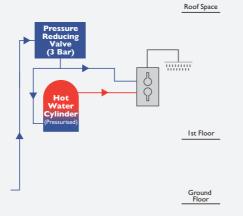

Found in newer UK housing.

- O Generally found wall-mounted in the kitchen.
- O Cold water pressure is as per the incoming mains.
- O Hot water pressure is as per incoming mains but generally reduced slightly due to pressure reducing valves, filters and flow limiters.
- O This type of system is generally considered as medium - high pressure.

#### Unvented

In UK housing with a hot water tank but no cold tank.

- O The cylinder(s) can be located anywhere in the house.
- O Hot and cold pressures are typically balanced.
- O Hot and cold-water pressure is typically 3 bar (as shown), otherwise the hot and cold pressure will be approximately the same as the incoming mains cold
- O This type of system is generally considered as high pressure.

#### **Aerators**

Abode taps use spout aerators or flow straighteners to add bubbles to the water. The aerators we use are of premium quality, ensuring the water flow is always controlled to eliminate splash back in use.

#### Valves

Abode use ceramic disc valves which are tested for over 200,000 cycles before we will pass them for use within our taps. We do this to ensure that under normal use conditions your tap valves have proven that they will work for many years to come.

#### Assurance

Abode taps undergo extensive quality testing including; robotic production of parts for complete precision and 100% end of line testing.

Our sophisticated hand polishing, plating, powder coating and lacquering techniques are also put through rigorous testing to ensure optimum performance. This includes: salt spray testing for 100 - 200 hours and surface resistance tests for 200 cycles using varying corrosives. We really put our products through the mill before we bring them to market to give our customers complete peace of mind.

#### Everything in the box

After taking all this care, we want to ensure our products reach you in perfect condition, with all the parts that you will need for a seamless and straightforward installation. Fixing kits and tail pipes (with non return valves where necessary) are provided. If the tap is heavy or tall, we also include a tap stabilisation bracket. We are also working hard to enhance the recyclability of our packaging in line with our company ESG targets.

#### Style

Designing our products in Britain means we have exclusive product collections to reflect the latest trends. We have boiling water taps designed to perfectly complement our customers kitchens without ever compromising on style. A collection which delivers convenience and a wealth of personalisation options, from finishes, textures, shapes and sizes. We aim to ensure you get the right model for the customer every time.

#### Why Abode instant hot water taps?

When we developed our innovative range of instant hot water taps in 2016, we considered every aspect of safety, not only for the dispensing of the instant hot water but also the maximum temperature requirements for the stored water in the tank. We chose to design and develop our Pronteau collection to store water to a maximum temperature of 98°C, in turn our products are fully compliant with Regulation 4 (part G(3)) of the UK Building Regulations, and all Pronteau taps, boilers and filters have approvals or approvals pending.

#### Instant Hot Water Collection

#### Features & Benefits

- O Three functions; domestic hot, cold and instant hot water.
- O Dual stage handle across the collection for safe water delivery.
- O Comes with the compact PROBOIL.2X boiler with a 2.1 litre capacity.
- O All Pronteau taps have cool touch spouts thanks to a centrally insulated steaming water channel.
- O Supplied with multistage filtration to address scale formation in the boiler, remove contaminants, and improve
- O Free filter recycle scheme.

balanced, elegantly styled dual lever monobloc tap that is packed full of personality and engineering excellence. A tap that truly combines classic with the contemporary, making it a great choice for traditional and modern kitchens alike.

The patented HotKey, 360-degree spout and anti-splash aerator gives you effortless control, optimal ease of use and complete unrestricted use for all the family.

#### The Boilers

#### PROBOIL.2X

Pronteau taps across pages 78 to 91 include the PROBOIL.2X boiler which has a 2.1L tank capacity.

#### PROBOIL.4E

#### Both boilers have the following features:

- O Controllable temperature range which can be set between 75 & 98° via the on screen digital controls.
- O Compact stainless steel tank which fits beneath a Belfast or Butler sink.
- O Simple to install via colour coded connectors.
- O On screen filter life indicator.
- O WRAS approved.

Scan to view all Pronteau videos on our YouTube channel.

#### National team of over 30 service engineers across the UK should you need us

Pronteau boilers are protected by our Proboil filters (supplied with all system purchases). These filters are essential to ensure protection of your boiler from scale build up as well as reducing water hardness out of the tap to improve taste and clarity of hot drinks.

Please visit www.pronteau.co.uk for more information on Pronteau maintenance.

### Hex Collection

#### Industrial Edge, Effortless Control.

The Hex collection is a bold fusion of industrial design and premium craftsmanship. Featuring striking hexagonal details on the handles, spout tip, and base, it brings an edgy, architectural look to any kitchen. The industrial-style hot and cold lettering adds a touch of vintage charm, while its solid brass construction ensures lasting durability.

Beyond aesthetics, Hex is designed for effortless performance. Ceramic disc valve technology provides ultra-smooth flow and precise temperature control, while flexible tail pipes and pre-fitted check valves make installation simple.

Available in a range of striking finishes, its the perfect finishing touch for a contemporary kitchen.

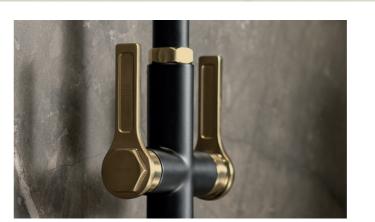

#### Features & Benefits

- O Hexagonal details and diamond-knurled finished create a bold, modern aesthetic.
- O Perfect for Statement Kitchens. A bold and unique design element that complements a vast range of interiors.
- O Vintage Inspired Hot & Cold Lettering
- O Premium Quality Brass Construction
- O Modern Ceramic Disc Technology. Allows for precise and effortless water control.

filtered water

Full specification documents can be found at www.abodedesigns.co.uk

> For replacement filters, please visit www.abode-shop.co.uk

#### Water Quality:

An Aquifier tap or Swich device filters particulates from water, reduces the taste and odour of chlorine and reduces water hardness.

#### Health:

Having filtered cold water on tap can encourage the consumption of more water. Fill a reusable water bottle each day directly from the tap.

#### Environment:

By removing the need for bottled mineral water every home with an Aquifier product is doing their bit for the environment by reducing single use plastic consumption.

#### Cost:

If bottled mineral water is a frequent purchase in your household you can save considerable amounts each year by switching to an Aquifier or Swich product.

#### Space saving:

If you have a water filtration jug or bought bottled water just think how much space you can free up in the fridge.

#### Appliance health:

If you live in an area with particularly hard water you will notice that the kettle suffers as a result of the limescale build up over time. Fill your kettle with filtered water and prolong its life.

#### How Aquifiers work

#### How often do I replace my filter?

It's simple to maintain your filter, it sits in a bracket, in the base cabinet below the sink. These are easy for anyone to replace using our simple, fast and secure 'SafeLock' system.

We offer a dedicated filter reminder service – we'll send you a reminder by email each time your filter is due for renewal.

Filters are easy to buy as singles or packs from www.abode-shop.co.uk when the time comes to replace.

It's important to change the filter at the recommended intervals to ensure the consistency of the supply of fresh, filtered drinking water.

#### Usage:

The Safelock high

resin filter included

free Abode filter

recycle scheme.

is part of the

The capacity of the filter for Aquifier and Swich products vary, these range between 1000L and 6000L (dependent on incoming water quality and usage).

We have both Classic and High Resin filters available, specifically tailored for use in soft water or hard water areas respectively.

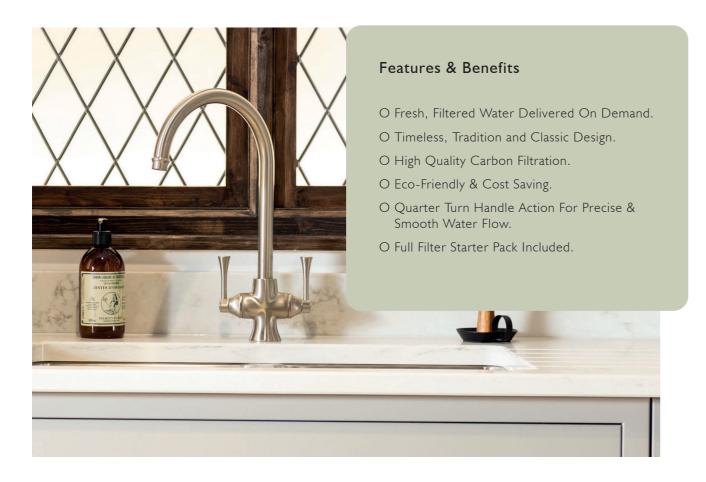

If you live in a soft water area the filter will be used up much slower than one in a hard water area (based on a standard average usage).

We recommend that our filters are changed every 6 months on average. If you live in a hard water area or have a higher filtered water consumption, replacements every 3-4 months may be beneficial.

swich

A revolution in filtered water technology

#### How does a Swich product work?

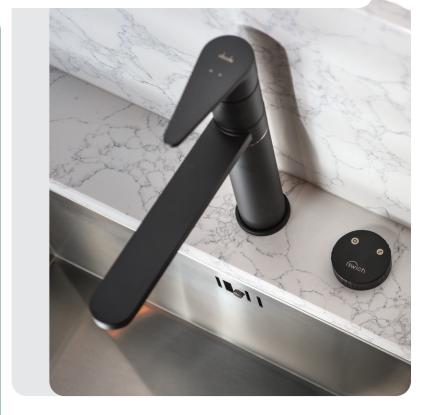

- O Convert ANY kitchen tap to one which delivers filtered water as well as the standard cold water supply.
- O The easy way to get filtered water from any style of tap.
- O Simple to install either through the worktop, or any standard sink 35mm tap hole or even in the sink cabinet.
- O Easy to use, just turn to divert to the filtered water function and back again to the standard cold water supply.
- O Can be installed alongside a new tap or retro-fit with an existing tap.
- O Award winning, unique product design.

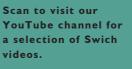

#### MAKE THE SWITCH FROM **BOTTLED** WATER, SAVE MONEY AND THE **ENVIRONMENT**

a selection of Swich

#### **Swich Collection**

#### A Simple Turn Towards Sustainability.

Imagine turning your existing tap, old or new, into a fresh, filtered water source at the simple turn of a dial. The Abode Swich is a small but powerful innovation, allowing you to reduce your reliance on single-use plastics while enjoying better-tasting, purified water straight from your tap.

#### Full starter kit supplied with each Swich

#### **Comprehensive Warranty**

In the unlikely event that you should experience any defect in the materials or workmanship of your new

- O Abode sink within 10 years of purchase
- O Abode tap within 5 years of purchase
- O ProBoil boiler within 2 years of purchase

The purchaser's sole remedy shall be the replacement (at the manufacturer's discretion) of all or any part of the product that is defective.

For the tap, all working parts and valves are guaranteed for a period of 5 years from date of purchase. Decorative surface finishes and O-rings are guaranteed for I year from the date of purchase provided that our advice concerning care has been observed and no scouring agents have been used.

This is provided that the sink, mixer or tap has been used for normal domestic purposes and that the care, installation and maintenance instructions have been observed. The warranty extends to the original purchaser only.

#### Caution

Repeated release of boiling hot water directly into coloured sinks can in extreme cases cause crazing and even cracking. Therefore we recommend great care is taken not to release the water directly on to the sink surface at full temperature for extended periods.

#### **Water Regulations**

All products should be installed in accordance with Local Water Bye Laws.

Visit www.abodedesigns.co.uk to search all products with a current WRAS approval.

Our ProBoil boilers store water at a maximum temperature of 98°C to conform to UK legislative limits. Spout exit temperatures will vary according to environmental changes and usage patterns.

www.carbonbalancedprint.com

#### **Technical Support**

Choosing the right mixer tap and sink for your home is an important choice as the tap is not only the most architectural item in your kitchen, but also the most used.

Think about the style you require, the ease of use you are looking for, and then consider your existing water supply and the water pressure available to you. If you have any questions with regards to whether a tap will be suitable for your application, please contact our technical support team or visit our website www.abodedesigns.co.uk for more details.

For sinks, consider the material and colour you prefer, the uses of the sink, the number and bowl sizes, the type of worktop material you propose to use and the base unit space available to install within.

Your long-term satisfaction with the product is important to us. In the event that you require spare parts for your Abode product, please contact our technical support team or visit our web site for further technical information.

Scan to visit our YouTube channel for support videos.
